### OBJECTIVE

I'm a versatile professional with expertise in web development and renewable energy design. My skills span front-end and back-end web development, database management, and problem-solving. I excel in teamwork and communication, thrive in high-pressure situations, and am committed to continuous learning. My goal is to use my skills to drive innovation and growth in a forward-thinking organization.

### WORK EXPERIENCE

○ JUN 2023 - Present

Coding Academy by Orange

#### Full-stack web developer trainee

Gained proficiency in various essential aspects of web development, including:

- Front-End Development: Successfully completed projects using HTML, CSS, JavaScript, and React.
- Back-End Development: Developed web applications and websites using PHP, Laravel, and WordPress.
- Database Management: Created and managed databases using SQL, MySQL, MySQLi, and PDO.

I've completed 10 projects, demonstrating my ability to apply these skills effectively and showcasing competence in each technology.

○ JUN 2021 – JAN 2023

AL-SHEHAB FOR RENEWABLE ENERGY

#### PV System designer Engineer

- Created steel structures using Sketchup and Staadpro systems.
- Developed electrical plans for solar system projects.

○ SEP 2021 – DEC 2021

ARISTO FOR RENEWABLE ENERGY

#### PV System Design Engineer

Designing PV systems using the following tools:

- PVsyst, Staadpro, AutoCAD, Sketchup, Microsoft office and data analyses

### PROJECTS

#### 1. HopeHarbor Donation Platform (Laravel)

[GitHub >>](#)

Led the development of "HopeHarbor," a Laravel-based donation platform for seamless charitable giving.

Technologies: Laravel, PHP, MySQL, JavaScript, HTML, CSS, Bootstrap

#### 2. Car Parts E-commerce Platform (PHP)

[GitHub >>](#)

Developed a PHP-based e-commerce platform for car parts, focusing on back-end development.

Technologies: PHP, MySQL, JavaScript, HTML, CSS, Bootstrap

#### 3. Company Exam Quiz Website (JavaScript)

[GitHub >>](#)

Developed a JavaScript-based quiz site for company exams with user-friendly features like timers and score calculation.

Technologies used: HTML, CSS, JavaScript, Bootstrap

#### 4. Docfind Booking Website (React)

[GitHub >>](#)

Docfind is a cutting-edge booking website designed to streamline the process of scheduling medical appointments with specialized doctors across various departments

Technologies used: React, CSS, Bootstrap
