PROJECTS

- **Booking website**

We have developed a fully responsive platform for booking office space where the lessor can display the real estate and the tenant reserves the office for the purpose of study or work using the Laravel library and bootstrap .

- **E-commerce Website**

Developed a responsive e-commerce website using php, HTML,CSS, and SQL DB and Implemented product listing, cart functionality, and secure payment integration.

- **QUIZ APP:**

Front-end Development: Divide the front-end tasks among your group members. Use HTML, CSS, and JavaScript to create the user interface, implement the design, and handle user interactions. Each member can work on different sections of the app, such as the homepage, quiz page, results page, etc.
