## Full Stack Web Developer

### CAREER OBJECTIVE

Ambitious software developer specializing in the MERN stack, eager to contribute to innovative projects within Jordan's technology industry. I hold a degree in Mechanical Engineering from Hashemite University and have 6 months of hands-on experience from an internship at Orange Coding Academy, where I completed 10 projects. My core skills in JavaScript, Node.js, React.js, as demonstrated through both training and academic projects. I am adept at problem-solving and analytical thinking, with a strong grasp of standardization policies and procedures. My interpersonal and communication skills are well-honed through effective team collaboration and leadership roles in various projects. I am seeking a challenging full stack development role where I can leverage my technical expertise, problem-solving abilities, and teamwork skills.

### Technical Skills

**Front-End Technologies:** react, redux, typescript, JavaScript, HTML/CSS (Tailwind, Bootstrap, SASS)

**Back-End Technologies:** Node JS, Express JS, Next JS, Nest JS

**Database:** SQL, PostgreSQL, Mongo DB, Firebase, MySQL

**Software Development Practices (SDLC):** Scrum, Agile

**Other Tools:** MS Office (Word, Excel, PowerPoint), Git (Version Control Systems), postman, Figma, Trello

**CMS:** Odoo

### Soft Skills

Software Development Learning Agility Adaptability Requirement Analysis	Critical Thinking Problem-Solving Ability Creativity and Innovation Customer-Centric Approach	Time Management Effective Communication Attention to Detail Team Collaboration
--	--	---

### Experience

**Coding Academy by Orange**

**Dec 2024 - Present**

**Full Stack Web Development Trainee**

**Work Experiences:**

- Completed an intensive full-stack web development course in partnership with Simplon.co and Princess **Sumiyaa** University for Technology (PSUT).
- Gained hands-on experience with the **MERN** stack (**MongoDB**, **Express.js**, **React.js**, **Node.js**) and another technology's through practical projects and coding Tasks.
- Developed and deployed full-stack applications, enhancing skills in both frontend and backend development.
- Participated in collaborative projects, applying Agile methodologies to manage and deliver high-quality solutions.
- Built responsive and user-friendly web applications, focusing on UI/UX best practices.
- Implemented **Redux** for efficient state management in React applications, improving performance and scalability.

---

## Projects

### 1) Office Rental Web Application:

Developed a feature-rich rental platform using React and Redux, with a firebase to handle backend operations. The platform streamlines the rental process, making it easier for landlords and tenants to connect and manage properties. [Github](#)

### 2) Jood Charity Website

Description: Jood is a charity platform designed to connect donors with beneficiaries in need. It offers a seamless and efficient experience for making donations, receiving aid, and managing charity operations. The platform is built using Express.js for the backend, PostgreSQL for the database, and React.js for the frontend. [Github](#)

### 3) Task Management Web Application:

Description: Built a React-based task management system to help employees organize their daily tasks efficiently. Integrated Firebase for real-time data synchronization, ensuring smooth task tracking and management. [Github](#).
