

Yousef Alsaïdh

Salt, Jordan • +962 770474356 • yousefalsaidh@gmail.com

Full stack developer | Software Engineer | Software Developer

CAREER OBJECTIVE

A Software Engineering student with practical training at Orange Coding Academy, proficient in HTML, CSS, JavaScript, PHP, SQL, Laravel, React, and Bootstrap. I aim to enhance my skills in building scalable web applications and applying Object-Oriented Programming (OOP) to create efficient and maintainable solutions. Passionate about continuous learning and solving technical challenges, I aspire to contribute to innovative projects that improve user experience and achieve business goals.

Core Competencies

Front-End Development	Critical Thinking	Time Management
Back-End Development	Problem-Solving Ability	Effective Communication
Development Frameworks	Project Management	Attention to Detail
Soft Skills	Creativity and Innovation	Team Collaboration
Requirement Analysis	Customer-Centric Approach	

Technical Knowledge

Programming Languages: HTML/CSS, JavaScript, PHP

Database: SQL, MySQL, phpMyAdmin

Operating Systems: Windows

Software Development Practices (SDLC): Scrum, Agile

Other Tools: Figma (Design and Prototyping), Git (Version Control Systems), github, canva

Internship

Orange Coding Academy, Salt
Trainee, Full Stack Department

May 2024 – Nov 2024

Work Experiences:

- Developed and maintained both front-end and back-end systems, contributing to the creation of responsive and dynamic web applications.
- Implemented and optimized RESTful APIs, enhancing data communication between server and client applications.
- Collaborated with cross-functional teams to design and deploy scalable software solutions, improving overall system performance and user experience.
- Integrated various third-party services and APIs, expanding the functionality and connectivity of web applications.
- Participated in code reviews and agile development processes, improving code quality and development efficiency.
- Utilized technologies such as JavaScript, PHP, React, Laravel, and SQL to build and enhance full-stack applications, ensuring seamless integration and functionality.

Academic Projects

1) Online Quiz Website

Description: The **Online Quiz Website** is a responsive platform using HTML, CSS, and JavaScript. It offers quizzes in multiple categories with real-time feedback and score tracking. Simple and interactive, it provides a fun learning experience.

2) E-commerce

Description: An online store for selling clothes. We worked on this project very hard and there are many features in this project.

3) Car rental project

Description: The Car Rental Project is a comprehensive system that simplifies car rentals with an intuitive interface for users to search, book, and manage their rentals. It includes a robust back-end for handling bookings and payments, secure payment processing, and an admin panel for managing car listings. The project focuses on user-friendly design and efficient system performance.

Education & Credentials

High School: Eurqa Secondary School

Average: 86.8%

Track: Scientific

Years: 2021 - 2023
