Projects

Adgriadventure [🔗](#)

Led front-end development for an agritourism website using React.js and Tailwind CSS. Collaborated on seamless PostgreSQL integration for efficient data handling, contributing to enhanced user interface aesthetics and experience.

ZexNews [!\[\]\(ade0d208c4c390ddb1e4e8e15fd95186_img.jpg\)](#)

Solo-developed ZexNews, an engaging WordPress-based entertainment news site. Featured responsive design, customizable themes, and effective SEO, resulting in a dynamic and user-friendly platform for staying updated on entertainment trends

Graze-and-Glaze [!\[\]\(c140ced51dbf5d4fbee7bbef0b65b56b_img.jpg\)](#)

Contributed to the front-end team for our e-commerce platform specializing in ceramic products. Utilized React.js, Tailwind CSS, and managed a PostgreSQL database to enhance the user interface and ensure a smooth shopping experience.

Book Craze, .e-library [!\[\]\(fa0af60b6801543fcbf5ea18bb648edb_img.jpg\)](#)

Served as a key member of an exceptional front-end development team for our collaborative project, where we designed and implemented an e-library using HTML, CSS, and JavaScript. Demonstrated proficiency in web development and contributed to the collective effort of resource curation.
