SUMMARY

Full Stack Web Developer with hands-on experience in the MERN stack. Completed 10 real-world projects through an intensive bootcamp with Orange Coding Academy. I have strong background in building and deploying web applications, with skills in JavaScript, Node.js, React.js, and problem-solving. I'm passionate about software development, highly detail-oriented, fast learner, and an effective team player.

EXPERIENCE

Full Stack Web Development Trainee

Orange Coding Academy

December 2024 – Present, Jordan, Amman

- Completed an intensive full-stack development bootcamp in collaboration with Simplon.co and Princess Sumaya University for Technology.
- Built and deployed multiple full-stack applications using the MERN stack.
- Completed 10 diverse projects, both individual and team-based, showcasing a wide range of technical and problem-solving skills.
- Participated in team projects with Agile methodologies using tools like Trello and Figma.
- Gained practical experience in front-end and back-end development with a focus on responsiveness and performance.

PROJECTS

Al-Joud

Orange Coding Academy • github.com/jenan-faraj/Nafas-pro.git

- **Description:** The Project **Al-Joud** is a web-based application designed to facilitate charitable donations for individuals burdened with large debts due to medical, educational, or family related needs. It enhances social impact by providing an intuitive platform where donors can explore verified cases, contribute securely, and track the progress of their donations. The platform ensures transparency and efficiency in fund distribution, connecting those in need with compassionate supporters.
- **Role:** Developer.
- **Tool used:**
- **Front-End:** React.js, Redux, Tailwind CSS. •
- **Back-End:** MySQL , PostgreSQL •
- Figma, Trello

CRIMEGAZETTE

Orange Coding Academy • github.com/jenan-faraj/crime-news-app.git

- **Description:** **CRIMEGAZETTE** is a web-based application designed to provide users with up-to date news on legal and social issues worldwide. It enhances user engagement by offering an intuitive interface for browsing news articles, reading in-depth case stories, and listening to dedicated podcasts discussing various global cases. Additional features are available for subscribers, allowing them to access exclusive content and personalized recommendations.
- **Role:** Developer
- **Tool used:**
- **Front-End:** React.js, Redux, Tailwind CSS.
- **Back-End:** MongoDB Atlas.
- Figma, Trello

Task Flow

Orange Coding Academy • github.com/jenan-faraj/task-mangment-app.git

- **Description:** The Task Management Website is a web-based application designed to help employees efficiently organize their daily tasks within a company. It enhances productivity by providing an intuitive interface for task creation, assignment, tracking, and completion.
- **Role:** Developer.
- **Tool used:**
- **Front-End:** React.js, Tailwind CSS.
- **Back-End:** Firebase (Real-time Database and Authentication).
- Figma, Trello

SmiloClinic

Orange Coding Academy

- github.com/jenan-faraj/Hospital-Management-System-.git
 - A fully responsive web-based Dental Clinic Management System that helps streamline operations for administrators, dentists, nurses, and patients. It allows appointment scheduling, patient record management, billing, staff availability tracking, and medical reporting — all through role-based access and a secure authentication system.
-
