Profile

I am an experienced web developer skilled in ReactJS, HTML, CSS, Node.js, Express.js, and various databases like MySQL, PostgreSQL, and MongoDB. I've successfully delivered dynamic web applications and APIs, and I've enhanced my skills through courses at Orange Coding Academy.

Skills

- | | | | |
|------------|-----------|--------------|--------------|
| • HTML | • CSS | • JavaScript | • SASS |
| • Git | • GitHub | • BootSTRAP | • Tilwind |
| • React.js | • Node.js | • MongoDB | • PostgreSQL |

Professional Experience

Trainee at Orange Coding Academy

09/2023 – 12/2023

- I completed 10 diverse projects, enriching my development experience and skills Back-End and Front-End Integration I successfully connected the back-end to the front-end of applications, enabling me to develop full-stack web applications.
- Proficiency in web development using HTML, CSS, and JavaScript I crafted advanced and visually engaging user interface
- I learned to use React.js to build dynamic and interactive user interface applications, providing exceptional user experiences.
- I have learned server-side development with Node.js and Express.js, allowing me to create API endpoints and work with MongoDB and PostgreSQL databases. These skills enable me to build robust server applications with efficient data management.

Projects

Book Store Website, Using React , JSON-Server [🔗](#)

"I created a user-friendly book store with diverse genres, login/signup, book details, reviews, shopping carts, and author profiles. The site is mobile-responsive and provides customer support for a seamless shopping experience."

Book-Reading, Using HTML , Tilwind and JavaScript [🔗](#)

project is a web application for reading and managing books, using HTML, CSS, JavaScript, and JSON-SERVER for data storage. Users can browse, read, and interact with a variety of books in a user-friendly interface.

e-commerce, Using nodejs , Express.js and Postgresql [🔗](#)

I created a secure e-commerce platform using React for the frontend and Node.js with Express.js and PostgreSQL for the backend. The project features Stripe payment integration, user authentication, and Google login/signup with database storage. Additionally, I played a key role as the product owner, overseeing the project, planning, and ensuring secure implementation.
