Communication Engineer | Full Stack Web Developer

## CAREER OBJECTIVE

Full Stack Developer with a background in communication engineering and over four months of focused training in HTML, CSS, JavaScript, PHP, Laravel and React. Skilled in building dynamic and responsive web applications, with hands-on project experience that demonstrates strong problem-solving abilities and a passion for creating efficient, user-friendly solutions. Adaptable and eager to leverage a diverse technical foundation to contribute effectively to development teams and create impactful digital experiences.

## Soft Skills

Good in managing time and organizing tasks.  
Career oriented, hardworking and having the ability to handle multiple tasks.

Quick learner and willing to learn new concepts in short time.  
Delivering presentation.  
Team Collaboration

Time Management  
Attention to Detail  
Problem-Solving Ability

## Technical Skills

**Front-End:** HTML5, CSS3, Bootstrap, JavaScript, React JS

**Back-End:** PHP, Laravel

**Database:** MySQL

**Operating Systems:** Windows.

**Software Development Practices (SDLC):** Agile, product-owner.

**Tools:** Visual Studio Code, Figma, Trello, GitHub.

## Internship

**Orange Academy, Location**

**Trainer, Full Stack Web Development Program**

**1 sep 2024 – Present**

### Work Experiences:

- Developed an e-commerce website, WAQT, as a PHP project focused on high-quality product sales, implementing CRUD operations with MySQL to manage data storage and retrieval effectively. ([GitHub](#))
- Led and collaborated on a group project, Bookify, a bookstore website, where the team utilized JavaScript for dynamic functionalities, including DOM manipulation, API data fetching from JSON files, and event handling. ([GitHub](#))
- Built Orange Community, a project using React for the front-end to create features like posting, liking, and saving content, with a Laravel back-end for managing data and APIs. ([GitHub](#))

## Academic Projects

### 1) Home Automation (graduation project)

**Description:** The project was about home automation by connecting Lab view with Arduino and the help of C language to control the sensors by a library of Arduino and C Language on lab view. The sensors used in-home automation were: motion sensor which opens the door, temperature sensor to turn on the fan after a certain temperature, the gas sensor gives an alarm to protect the home from fire, while the LDR sensor is used to move the curtain by servo motor which depends on light

## Education & Credentials

### University Al-Balqa Applied University (polytechnic)

2018

Bachelors in communication engineering

**Grade:** 3.36 out of 4 (very good)

### Conferences and Training Attended:

- **Full Stack Web Development Bootcamp May 2024 – Present** (By Orange Coding Academy)
  - Intensive course in Full Stack Web Development by Orange Coding Academy in collaboration with Simplon.Co and Princess Sumaya University for Technology (PSUT).
- **The National ICT Up Skilling Program Aws Cloud Computing 2022** (Al-Hussain Technical University)
  - Certified training program, total training hours 320 designed for
  - Technical skills, soft skills and English skills
  - Capstone Project using AWS Cloud Computing (Build a real highly available WordPress website, build a server less application using AWS, design a simple website using cloud formation)

## Languages

**Arabic:** fluent

**English:** very good
