Full Stack Web Developer

Career Objective

A Computer Information Systems graduate from Jordan University, bringing proven IT training experience with Orange Coding Academy. Equipped with foundational skills in software development. Proven ability to apply technical skills in Javascript, PHP, and Python in practical, real-world situations, demonstrated through internships and academic projects. Adept at problem-solving and analytical thinking. Brings strong interpersonal and communication skills, fostered through successful team collaborations and leadership roles in various projects. Looking to leverage extensive academic training and internship experience in dynamic entry-level IT positions.

Training

Orange Coding Academy

May 2024 – Current

Trainee | Full Stack Development

- Designed a personal portfolio to showcase skills and projects acquired throughout the cohort
- Participated in 120 hours of soft skills training which were very beneficial on the professional aspect and the personal aspect.
- Collaborated with a team on daily tasks enhancing teamwork and technical skills for the duration of 6 months.
- Was an integral part in the design and implementation of database management solutions, enhancing data integrity and performance.
- Participated in the preparation and presentation of countless lectures and lessons to my fellow cohort-mates with a variety of people.

Academic Projects

Adaptive Exam System

Description: The Adaptive Exam System is designed to address the ineffectiveness of traditional exam processes. The system provides learning resources based on poorly answered questions relating to a certain subject. The questions get harder or easier depending on how good the user is answering previous questions.
