## EXPERIENCES

### Trainee

**Jun2019 - Dec2019**

### Orange coding Academy

I was among 50 students in Orange coding academy and we were trained how to code from scratch,

started with HTML-CSS then moved to advance topics which is developing a client side using JavaScript, we got a training also on react js + native and with Mongos we managed to build full stack web apps (MERN stack). after that we Learned PHP and laravel frame work to deal with the server side of the web app.

finally, we have learned how to develop web and desktop application with python language.

Soft skills mini courses were provided to us by Orange.

### Academy and Marketing coordinator

**May 2016-July 2016**

I was Managed all online advertising ,event ,social media ,and professional associations also that Advertise and marketing for courses through email and social media and answered calls and reply back to emails related to training inquiries
