About Me

full-stack web developer trained at Orange , and a full-time student of computer science for a bachelor's degree at BAU , over the intensive course I have built precious knowledge primarily for instance coding in PHP , JavaScript etc. and secondarily we learned about IT related topics like the agile methodology , UI UX design and more .

Tertiarily along this course we have also built up knowledge about topics related to topics about ethics of workplace and business related topics like entrepreneurship and creating a business model for any business .

Expertise

1. personal Portfolio using HTML5, CSS3 and a minimum usage of bootstrap .
2. In-house Employee Evaluation website Using JavaScript we've used tools like Trello and discord to connect together as a team
3. music e-commerce store using WordPress as for this project I have built this project using only WordPress tools like plugins , templates and so on ... and GitHub to upload my work
4. accessories e-commerce using PHP
5. pharmacy management system using Laravel we have used Trello to set each members assignment and discord as our communication channel
