ERP| Full Stack Developer

CAREER OBJECTIVE

A recent **Accounting Information Systems** graduate from **Al-Balqa Applied University**, with hands-on **ERP** internship experience at **Ayla Company**. Further honed technical skills at Orange Coding Academy, **specializing in** Java, PHP (Laravel), MySQL, HTML, and CSS. **Strong foundation in software development, database management, and web technologies**, coupled with problem-solving abilities and analytical thinking. Demonstrated adaptability and teamwork through various academic and practical projects. Eager to apply technical expertise and internship experience in a dynamic entry-level IT role.

Core Competencies

ERP System Data Analytics Data Analytics Skills	Project Management Time Management Creativity and Innovation	finding simple ways to fix challenges. learn new things quickly. working with others and being part of a team.
---	--	--

Technical Knowledge

Programming Languages: Java, PHP, JavaScript, HTML/CSS

Database: MySQL

Operating Systems: Windows

Software Development Practices (SDLC): Agile

Other Tools: MS Office (Word, Excel, PowerPoint), Git (Version Control Systems)

Internship

Orange Coding Academy, Salt

Dec 2024 – May 2025

- Assisted in various programming tasks, contributing to the development and improvement of front-end and back-end systems.
- Gained hands-on experience with web technologies, including **HTML, CSS, Java, PHP, React, Wordpress, python and Laravel**, during the development of practical projects.
- Supported the implementation of new web solutions, applying theoretical knowledge to real-world applications.
- Collaborated with a team of developers on daily tasks and long-term programming projects, enhancing technical skills and teamwork.
- Participated in the design and development of web applications, focusing on performance optimization and responsive design.

Academic Projects

Project Name: Volunteer Work Platform

designed to connect volunteers with non-profit organizations and causes that need support. The platform allows users to register as volunteers, browse available opportunities, and track their

participation in various projects. Non-profit organizations can post their needs and manage volunteer registrations. The system features user-friendly navigation, a secure login system, and real-time updates on project statuses. The platform aims to streamline volunteer management and make it easier for individuals to contribute to causes they care about.

Technologies Used:

- **Backend:** Laravel (PHP)
- **Frontend:** HTML, CSS, JavaScript
- **Database:** MySQL
- **Other Tools:** Git (Version Control), Bootstrap (for UI)

Role:

As a developer, I was responsible for implementing the user registration system, designing the database schema, and integrating the front-end and back-end for a seamless user experience.

Project Goal:

To provide an accessible, reliable, and efficient platform for volunteers and non-profit organizations to connect, manage, and track volunteer work.

Education & Credentials

Al-Balqa Applied University, Jordan

Bachelor's in Accounting Information Systems, 2024

Conferences and Training Attended:

- Completed programming training at **Orange Coding Academy**, focusing on **Java, PHP (Laravel), MySQL, HTML, and CSS**.
- Participated in various coding workshops and hands-on projects to enhance technical skills and practical knowledge.
