System Engineer | Full-Stack Developer

CAREER OBJECTIVE

Motivated and passionate software engineer with a strong foundation in front-end and back-end technologies. Currently pursuing a degree in Artificial Intelligence at Aqaba University of Technology while enhancing my technical skills through hands-on experience and training. Seeking opportunities to apply my knowledge in real-world projects, collaborate with innovative teams, and continuously grow as a full-stack developer. Dedicated to problem-solving, learning new technologies, and contributing to impact software solutions.

Core Competencies

Attention to Detail	Critical Thinking	Time Management
Requirement Analysis	Project Management	Problem-Solving Ability
Team Collaboration	Creativity and Innovation	Effective Communication

Technical Knowledge

Programming Languages: C++, JavaScript, HTML/CSS, PHP

Database: SQL, MySQL, SQL Server

Frameworks & Libraries: Laravel, React.js

Software Development Practices (SDLC): Scrum, Agile

Academic Projects

1) E-Commerce Website for Electrical Devices

Designed and developed a fully functional e-commerce platform for selling electrical devices. Implemented key features such as product catalog, user authentication, shopping cart, and secure checkout. Developed the backend using **PHP** with **MySQL** for efficient data management and transaction handling. Ensured a responsive and user-friendly interface using **HTML**, **CSS**, and **JavaScript** to enhance the shopping experience.

2) Orange Coding School(School System Management)

- * Designed and developed a fully functional school system management platform focused on student and course management.
- * Implemented features such as student records, course catalog, and teacher assignments management.
- * Used React to build a dynamic and responsive user interface, ensuring smooth interactions and fast updates without page reloads.
- * Integrated user authentication for secure access to different user roles (admin, student, teacher).
- * Focused on responsive design to ensure the platform is optimized for both desktop and mobile devices, providing a seamless experience for all users.

3) LuxeLodge(reservation system)

- * Designed and developed a fully functional reservation system for a hotel booking platform.
- * Implemented features such as room booking, availability checks, and user account management.
- * Used Laravel 10 for backend development, ensuring secure and efficient data handling and processing.
- * Integrated a seamless reservation process with payment gateway for secure online payments.
- * Focused on responsive design, making sure the platform is optimized for both mobile and desktop devices, ensuring a smooth user experience across all devices.
