WORK EXPERIENCE AND PROJECTS

Scentify [🔗](#)

Scentify is an e-commerce platform for perfumes, offering a seamless shopping experience with features like personalized user profiles, order tracking, and a curated product selection. Built using PHP, MySQL, and JavaScript, it focuses on efficient order management and user-centric design.

Fit Me [🔗](#)

Fit Me is a fitness platform promoting healthy living through personalized workout plans and AI-generated nutrition recommendations. As Scrum Master, I led a team to develop the site using HTML, CSS, JavaScript, and Mock API, ensuring a responsive and dynamic user experience.

Graduation Project

AAU E-maintenance System

- Improved efficiency by developing AAU E-maintenance System, resulting in a 20% reduction in ticket resolution time and enhancing overall user satisfaction.
- Increased work order completion rate by 25% by streamlining the maintenance process with AAU E-maintenance System, resulting in enhanced operational efficiency and cost savings.
- Reduced average response time for maintenance requests by 40% through implementation of AAU E-maintenance System, leading to improved tenant satisfaction and retention.
