## PROJECTS

- Develop a quiz website that incorporates login and registration functionalities along with local storage. This website is built using various tools such as JavaScript (JS), HTML, and CSS.
  - Develop ecommerce websites that facilitate the purchase of flowers. Our team of programmers utilizes languages such as JavaScript (JS), HTML, CSS, PHP, and SQL to create these websites.
  - Develop an appointment-website for car rental services with three levels of users: Lessor, Renter, and Administrator. This website utilizes various technologies such as JavaScript (JS), HTML, CSS, PHP, Laravel, and SQL .
  - I skillfully developed my own website portfolio using HTML and CSS, combining captivating design elements with seamless functionality to present my work effectively.
