Frameworks/Platforms: Laravel, React, NodeJS, WordPress

Database: SQL, MySQL, SQL Server

Operating Systems: Windows

Other Tools: MS Office (Word, Excel, PowerPoint), Git (Version Control Systems)

Academic Projects

(1) [My prototipo](#)

Description: project, 'My Personal Portfolio' I used enjoyable technology in this project, utilizing Bootstrap for the Navbar and developing the rest of the sections using HTML and CSS only.

(2) [Building an QuizWensite](#)

Description: We developed an interactive online quiz website! Users can take their pick from three different quizzes, all accessible from a single platform. After completing a quiz, the website displays their score along with detailed results, highlighting both correct and incorrect answers.

To bring our website to life, we used a variety of technologies:

HTML & CSS: The foundation of web development, these tools allowed us to structure and style our web pages.

Bootstrap: This framework ensured our website looked great and functioned seamlessly across all devices.

JavaScript: We leveraged JavaScript to add interactive features, validate forms, and manage data effectively.

(3) [Ecommerce-Website](#)

Description:

A clothing e-commerce website where users can browse, purchase, and wishlist different sorts of clothes, in addition to a full admin dashboard, built with PHP, JavaScript, CSS, and HTML. It was a great experience being the Scrum Master for this team, where we all worked together, supporting each other every step of the way.
