Experience

1) Orange Coding Academy

Aqaba 2024-May

Full-stack web development Trainee

Work Experiences:

- Using the active learning methodology to learn about the best and most used web development technologies and languages.
- Learning Frontend & Backend technologies such as wireframe design with figma, front-end development with HTML5, CSS3, JavaScript, and React, database management with Mysql, and backend development with php and the Laravel framework.
- Applying the technical knowledge by engaging in many personal and group projects where we utilize the agile methodology with each group having a scrum-master and a product owner with constant meetings.
- Developing our soft skills further with activities & lectures from a variety of experts in different fields.

Academic Projects

1-Task management

Task management software is an organizational tool that aims to simplify the tracking and distribution of tasks within teams or individuals, making it easier to allocate time and ensure efficient project delivery. The software provides a flexible interface to assign tasks, track their progress, and assign them to team members, boosting productivity and ensuring everyone meets deadlines.

2- Property nexus

Property nexus is a comprehensive web application designed to simplify the process of advertising, inquiring, and purchasing properties. Whether you're a property owner looking to list your property, a buyer searching for the perfect home, or an agent managing multiple listings, Property Nexus offers a user-friendly interface and robust features to meet your needs.

3- Quick Journey

Comprehensive platform designed to streamline the process of booking trips and tours across the breathtaking destinations in Jordan. Our website offers a user-friendly interface that allows travelers to effortlessly browse, select, and reserve their desired trips.
