FULL STACK DEVELOPER

As a full-stack developer with 8 months of experience, I have designed and deployed web applications using diverse technologies and frameworks, specializing in front-end development with HTML, CSS, and JavaScript, including React and Angular. On the back-end, I have utilized Node.js, PHP, and Laravel to build robust APIs, while working with SQL databases for efficient data storage and retrieval. I possess strong problem-solving skills, a continuous learning mindset, and a passion for delivering innovative solutions and exceptional user experiences.

PROJECTS

Renting Farm website

developed a user-friendly renting farm website using Laravel, Bootstrap, HTML, CSS, JavaScript, PHP, and MySQL. The website featured seamless communication between the frontend and backend, ensuring efficient database management and user authentication. Interactive JavaScript elements were incorporated for real-time updates and input validation, providing a secure and responsive experience.

Jewelry Shop

Developed an engaging e-commerce jewelry website with PHP, JavaScript, HTML, CSS, Bootstrap, and MySQL. Created an attractive and responsive interface for easy navigation, product browsing, and cart management using HTML, CSS, and Bootstrap. Leveraged PHP and MySQL for efficient user registration, login, authentication, and seamless data storage. Enhanced the user experience with dynamic product filtering and real-time cart updates using JavaScript, ensuring a secure and seamless platform

Online Quiz Application

I created a user-friendly online quiz application using JavaScript, HTML, and CSS. The interface allowed easy navigation through quiz questions and selection of answers. With JavaScript programming logic, the application tracked scores, displayed correct answers, and provided real-time feedback. The inclusion of randomized options for multiple choice questions and timers added fairness, challenge, and a dynamic experience to the quiz.
