Profile

Passionate about technology from an early age, I turned my curiosity into a Computer Science degree. With a background in disassembling electronics and a love for learning, I now thrive as a web backend developer, contributing to the dynamic field of technology.

Education

Al- Balqa' Applied University (BAU) 2019 - 2023:

Bachelor of Science in Computer Science

Experience

Trainee at Orange Programming Academy (09/2023 - 12/2023):

Acquired proficiency in HTML, CSS, JavaScript, PHP, and Laravel through a self-directed program, with hands-on experience in MySQL database management. Developed a proactive and adaptable mindset.

Clever Mind (2/2023 - 6/2023):

Gained foundational programming skills and proficiency in HTML, CSS, and JavaScript, preparing for a career in software development.

Projects

Online Quiz Website:

Constructed an interactive quiz platform with JavaScript, HTML, and CSS, showcasing adept skills in front-end development.

Volunteer Management System:

Developed a robust Back-End solution using PHP, MySQL, and API integration, ensuring efficient volunteer management and seamless communication.

Ecommerce Website:

Led the creation of a dynamic e-commerce platform with PHP and MySQL, emphasizing intuitive Front-End design and secure Back-End functionality. Crafted a seamless online shopping experience, aligning closely with client specifications for diverse product categories.
