## PROJECTS

### Bit-City - Social media project :

Developed Bit-City, a social media platform for crypto lovers, using React and JSON for data storage. Enabled seamless interactions through posts, comments, and engaging user interactions.

### Company – Ecommerce project :

Implemented a dynamic e-commerce platform showcasing an extensive product catalog, empowering users to make purchases. Developed with React, HTML, CSS, and JavaScript, delivering a user-friendly and interactive shopping experience.

### Dukan - Ecommerce project:

Created "Dukan," an e-commerce platform featuring exquisite handicraft and artistic works from local artists, leveraging React, Node.js, and MongoDB. Developed a visually captivating and functional website to promote and facilitate the sale of unique and culturally rich products.
