QUALIFICATIONS I can develop Machine learning models to provide businesses with demand forecasting learning from past data to predict future demand trends, taking into consideration the variation of demand based on seasons, weekdays, holidays, and other external factors to reduce the number of wasted resources and improve decision making and planning.

My customer service and sales experience installed within me the understanding of retail businesses which helps me better understand the data I will work on.

EDUCATION

Bachelor of science in mathematics

Yarmouk university

Obtained a major in math and a minor in applied statistics.

Relevant coursework:

Regression analysis Real analysis.

Numerical analysis.

Analysis of variance and experimental design.

Data Science

Orange Coding Academy

Crash course in Data Science

Skills:

Machine Learning.

Data Analysis and Visualization.

Proficient in using Python libraries for data science.

SQL, Excel, Tableau.

EXPERIENCE

Amazon, Extensya

Customer Service Associate
