- |             |              |                |
|-------------|--------------|----------------|
| ▪ HTML& CSS | ▪ JAVASCRIPT | ▪ DEATIL       |
| ▪ PHP       | ▪ REACT      | ORIENTED       |
| ▪ LARAVEL   | ▪ WORDPRESS  | ▪ PRESENTATION |
|             |              | SKILLS         |

# PROJECTS

- **Exam Website:** I have created a website for generating exam questions using HTML, CSS, and JavaScript. The website is user-friendly and the data is stored in the local storage.
- **E-Commerce Website:** I have created a website for selling jewelry using Bootstrap, HTML, CSS, JavaScript, and PHP. The data is stored in a database, and MySQL technology was used for this purpose.
- **Apartments Rental:** I have created a website for renting apartments, chalets, and similar accommodations using the following technologies: Bootstrap, HTML, CSS, JavaScript, PHP, and Laravel. The data is stored in PhpMyAdmin. The website caters to multiple categories and is distinguished by its user-friendly interface.
