[mohammad-aldoer](#)

Versatile Computer Engineer and Full Stack Developer with expertise in Network and Operating System skills. Proficient in JavaScript, Node.js, Java, Spring Boot, and React.js, adept at creating intuitive web applications. Collaborative team player, ensuring seamless integration across projects. Stay up-to-date with industry trends, always seeking innovative solutions. Eager to contribute skills to impactful projects.

## Experience

February 2023 – July 2023

### ● Orange Coding Academy full stack developer

- Successfully delivered a remarkable portfolio of 10 projects, showcasing exceptional proficiency across a diverse range of technologies. Contributed both as an independent achiever and as a valuable collaborator within a team.
- Acquired extensive training exceeding 100 hours, demonstrating a strong command of essential soft and digital skills. This comprehensive program covered vital aspects such as emotional intelligence, change management, and adaptability.
- Expanded and deepened expertise in cutting-edge technologies, including JavaScript (React), Node.js, Express.js, MongoDB, SQLite, and React Native. Demonstrated a keen aptitude for mastering the intricacies of these contemporary tools.

## Education

2018 – 2023

### ● Yarmouk university

- Bachelor of computer engineering
- GPA: 80.7

## Skills

### technical skills

- Java
- Java Spring boot
- oop
- Docker
- microservices
- react.js
- SQL, SQLite, MySQL
- RESTful API
- HTML, CSS
- javascript
- Node.js
- NoSQL, MongoDB
- Express
- Algorithms, Data Structures
- C, C++, C#
- UI/UX

### soft skills

- problem-solving
- agility
- Creativity
- time management
- Emotional intelligence
- Presentation Skills
- Team Work
- Adaptability

### Tools

- Git
- Visual Studio
- netbeans
- Visual Studio Code
- Postman
- Figma
- Trello
- Jira

## Projects

---

### Social Media dashboard

The Social Media Dashboard project is a comprehensive web application that provides users with a centralized platform to manage and monitor their various social media accounts in one place. Built using the MERN stack (MongoDB, Express.js, React.js, and Node.js), this project offers a seamless and efficient experience for users to interact with their social media profiles, schedule posts, analyze engagement metrics, and more.

### E-commerce

The E-commerce project is a modern and feature-rich web application that facilitates online buying and selling of products. Developed using Java for the back-end and React for the front-end, this project offers a seamless and secure shopping experience for customers and provides a comprehensive management system for store owners.

## Volunteering

---

- Co-founder at digital team YU workshops
- lecturer at digital team YU
- Operations Team Member at GDSC ( Google Developer Student Clubs )
