About Me

As a Jr. Full Stack Developer, my goal is to utilize my boot camp experience and knowledge of web development to create user-friendly applications that meet business needs. With hands-on experience in HTML, CSS, Bootstrap 5, JS, ReactJS, NodeJS, MySQL, and MongoDB, I am committed to delivering exceptional user experiences. I continuously learn about emerging technologies and industry trends to contribute to innovative teams and positively impact the digital landscape.

Professional Experience

Full Stack Trainee | Coding Academy by Orange

02-2023 – 08-2023

Projects

- **Good Food Good Mood:**

A web application aimed at reducing food waste by connecting users with unsold food items at their favorite food spots. Users can browse available food items and purchase them at a discounted price before they go to waste. The application is built using React.js, Node.js, and PostgreSQL.

- **TableXpress:**

A web application designed to streamline the process of reserving tables at a restaurant. This intuitive and user-friendly system allows customers to easily make table reservations based on their preferred food category, ensuring a personalized dining experience, Built using React.js, Node.js, and PostgreSQL.

- **Book Shop:**

An e-commerce website that enables users to easily find scientific books they need with a cash-on-delivery option. The platform provides a convenient shopping experience for customers who are looking for specific books. The website is built using ASP.Net MVC core.

- **Show Me The Way:**

A simple maze game built using Java, with threads and Java Swing used to display the game. Players navigate through a maze, collecting points along the way and trying to reach the end as quickly as possible.
