### Professional Experience

---

**Back-End trainee,** *Coding Academy by Orange* 09/2023 – 12/2023

- Developed a solid understanding of SQL database management, including query optimization and database design.
- Acquired hands-on experience in back-end programming languages such as PHP and frameworks like Laravel.
- Managed version control and collaborative development using Git and GitHub, ensuring seamless teamwork and efficient code management.

**Civil Engineer,** *Delma Construction Company* 08/2022 – 07/2023  
supervision the finishing works such as plumbing, plastering, tiling and other works.

### Projects

---

#### Quiz website

Built responsive quiz website with registration/login, sequential multiple-choice format, pass/fail result pages, review feature, YouTube API integration. Ensured security, informative confirmations, and efficient assessment tool for candidates' knowledge and skills.

#### Volunteer Management System

Developed a PHP and MySQL-based Volunteer Management System with an admin dashboard. Users can search, register, and interact with events, while admins manage events, categories, and user profiles. The system prioritizes security, efficiency, and user-friendliness.
