

MONTER AL-TWAISSI

Full-Stack Developer

PERSONAL SUMMARY

I started my career as a civil engineer, which allowed me to build analytical logic and problem-solving. But I have always been passionate about programming, so after finishing university I started thinking of a career in it. Joining the Coding Academy by Orange was my serious move towards refining both: hard and soft skills and empowering my active learning mindset.

Always working on mastering required skills to get the chance to be productive and implement real technical products.
