 - Creativity
-

EXPERIENCE

Full-Stack Web Development Trainee | Orange Coding Academy, Amman/Jordan

Jan 2025 – Present

- **Front-end:** Developed responsive and interactive user interfaces using HTML, CSS, JavaScript, React.js, enhancing the user experience with clean UI/UX principles.
- **Back-end:** Built and maintained web applications using PHP, LARAVEL Ensured efficient data management and scalability by consuming APIs and integrating back-end services.
- **Database:** Managed and optimized MySQL Server databases. Created and executed queries for efficient data retrieval and ensured database performance.
- **Project Work:** Delivered 8 full-stack web projects, applying skills to real-world scenarios. Developed scalable, maintainable, and high-performing applications.
- **Collaboration:** Worked closely with teams to implement project requirements and ensure the seamless integration of front-end and back-end systems.

PROJECTS

- My Portfolio ([Github](#)): Contain my personal information, specialization, experience and main skills, using HTML, CSS, JavaScript.
 - Car Rental Website ([Github](#)): This project is a car rental website designed to make the process of renting a vehicle simple, fast, and convenient. Users can browse available cars, compare prices, and book their preferred vehicle online, using HTML, CSS, JavaScript.
 - Pet Lover e-commerce Website ([Github](#)): This project is an online store dedicated to selling food and accessories for dogs and cats. The website offers a variety of high-quality pet products, including nutritious meals, toys, grooming items, and stylish accessories, using HTML, CSS, JavaScript, PHP, MySQL.
 - Victory Field e-commerce Website ([Github](#)): VictoryField is an innovative online platform that allows users to explore and book sports fields for various activities quickly and easily. Our website provides detailed information about different sports, their rules, and booking prices, helping users make informed decisions based on their preferences, using HTML, CSS, JavaScript, PHP, MySQL, Laravel.
 - HR Management System ([Github](#)) : This project is a mobile application designed to streamline employee attendance and leave management. Using location-based technology, the app allows employees to check in and out only departure and view their remaining work hours, using Flutter, dart, firebase.
