Projects

CraftVine E-commerce [↗](#)

I've worked on the CraftVine website, an online platform for buying and selling furniture. The goal was to create a user-friendly and visually appealing shopping experience while ensuring security. I used modern web technologies and best practices for this project, including: Figma, React, Tailwind, and Trello

BookCraze E-library [↗](#)

A website dedicated to books, it is designed and developed to provide an interactive platform for book enthusiasts to discover, discuss, a search bar for easy book discovery, the application boasts a rich Book catalog Page, displaying detailed book information, and a User Profile Page for managing favorites and reading lists. We use: HTML5 | CSS3 | JavaScript (ES6+) | JSON | Firebase | Trello management | Team work | (UX/UI Design) View Project Video [↗](#)

Cine Application [↗](#)

As a dedicated professional, I have spearheaded the development of a cutting-edge cinema application using Flutter and Dart. This innovative platform empowers users to effortlessly reserve movie tickets and pre-order snacks, elevating their cinematic experience. Notably, the application boasts a unique feature that enables users to download movies for offline viewing within a specified time window, further enhancing accessibility and convenience using Flutter and Dart technologies.
