## PROJECTS

- E-commerce website : I have experience in developing an e-commerce website that provides a seamless online shopping experience. This website was designed with a user-friendly interface and implemented using technologies such as HTML, CSS, JavaScript, and PHP.

- Online quiz system : The website incorporates a collection of quizzes developed with JavaScript, HTML&CSS
- Booking Website: This website facilitates easy farm rentals for users, offering features like search functionality, review system, and comments. It also provides property owners with the opportunity to market and showcase their farms through a tenant dashboard. The website was built using HTML, CSS, JavaScript, and Laravel.
