Web Developer | Full Stack Developer

## CAREER OBJECTIVE

Dedicated and detail-oriented web developer with a background in programming. Transitioned into the tech field through Orange Academy for Programming, specializing in backend development with Laravel and PHP. Proficient in HTML, CSS, JavaScript, MySQL, and PHP Data Objects (PDO). Strong problem-solving skills and ability to design efficient database structures. Effective team player with experience in project management and presenting technical concepts clearly. Seeking to leverage technical expertise and analytical thinking to develop scalable and high-performance web applications

## Core Competencies

Problem-solving	Critical thinking	Time management	Creativity
Clear communication	Attention to detail	Teamwork and leadership	

## Technical Knowledge

- **Programming Languages:** Laravel, React, JavaScript, HTML/CSS , PHP
- **Database Management:** SQL, MySQL
- **Operating Systems:** Windows
- **Development Practices:** Scrum, Agile
- **Tools:** Git (Version Control), MS Office (Word, Excel, PowerPoint)

## Internship

**Orange Coding Academy, Aqaba**

**Intern, Full Stack Web Developer**

**Work Experiences:**

**Full-stack** web development experience using **PHP, MySQL, Laravel, and JavaScript**.

Built an e-commerce platform in a team, focusing on UX and backend optimization.

**Implemented database features**, secured data handling, and optimized queries. Used **GitHub** for version control in team projects.

Worked with AJAX, JSON, and APIs for dynamic web apps.

## Projects

### 1)Portfolio Website

Built a responsive portfolio to showcase web development skills using "HTML", "CSS", "JavaScript", and "PHP". Features dynamic content updates and an intuitive user interface, demonstrating projects, skills, and experience.

### 2)Orca Diving

Developed a booking platform for a diving center with features for dive browsing, reservation management, and secure payment processing. Built with "Laravel" and "MySQL", supporting CRUD operations for dives, bookings, and user/admin management, ensuring scalability and performance. Used Laravel's routing, controllers, and Blade templating to create a beginner-friendly architecture. Designed an intuitive interface for guests and admins to manage bookings efficiently.

### 3)Tuxedo E-Commerce Website:

Full-stack platform for tuxedo sales with an admin panel for managing products, orders, and users. Customers can browse and purchase items. Implemented secure payment gateway and optimized user experience. Built with "PHP", "MySQL", "HTML", "CSS", "JavaScript", and "Bootstrap". Hosted on "GitHub".

#### **4)Orange Coding School (School System Management)**

Developed a school management system to manage student records, course catalogs, and teacher assignments. Used "React" to create a dynamic, responsive UI for smooth interactions and quick updates without page reloads. Integrated secure user authentication for role-based access (admin, student, teacher). Optimized the system for scalability and real-time updates. Built with "React", "Node.js", "Express", and "MongoDB".

#### **5)Focus Flow**

Developed a task management website to help users organize and track tasks efficiently using "HTML", "CSS", "JavaScript", and "PHP". Features include dynamic task updates, user-friendly interface, and integration with "MySQL" for data storage, aimed at improving productivity and focus.

### **Education & Credentials**

Graduated with a General Secondary Education Certificate from

Al-Namothajiyah Al-Ilmiyah School (2023-2025)

### **Personal Information**

- **Name:**Hamed abu-helaleih
- **Date of Birth:** 25 November 2006
- **Nationality:** Jordanian
- **Marital Status:** Single
- **Languages:** Arabic (native) , English (C1)
