## SUMMARY

Software engineer and a backend web developer, with a solid understanding of software engineering principles, drawing from hands-on experience to apply software engineering principles effectively in projects.

---

## SKILLS

HTML  
CSS  
JavaScript

Git/GitHub  
Bootstrap  
MongoDB

NodeJS  
Express  
Postgres

---

## EXPERIENCE

### Trainee at Coding Academy by Orange

09/2023 – 012/2023

Intensive course in Back-end Web Development in collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT).

#### Accomplishments:

- Proficient in Git and GitHub for collaborative projects, including branching and conflict resolution.
  - Gained web development skills through tutorials and hands-on projects, focusing on interactive web pages.
  - Expert in server-side development using Node.js to build RESTful APIs.
  - Streamlined web server development with Express.js, mastering routing and middleware.
  - Skilled in relational databases, particularly PostgreSQL, for structured data management and complex queries.
  - Expanded expertise to NoSQL databases, particularly MongoDB, for tasks like user authentication and unstructured data storage.
  - Possessing a strong foundation in Object-Oriented Programming (OOP), facilitating modular and maintainable code for comprehensive software solutions.
- 

## PROJECTS

### Giftify

[gitHub](#)

Giftify revolutionizes gifting with cutting-edge tech. Using React and Tailwind for a sleek interface, our Node.js and Express backend, paired with Postgres, ensures seamless functionality. Security is paramount —Google login, Multer, Firebase streamline image uploads, while JWT ensures a secure dashboard. With Stripe integration, Giftify guarantees a swift and secure online payment experience. Elevate your moments with Giftify's seamless blend of innovation and personalized celebration.

### **charity website**

[gitHub](#)

This project is a charity website designed for backend developers, utilizing MongoDB as the database. The website incorporates Google login for user authentication, Multer and Firebase for seamless image uploads, and JWT for secure dashboard access. Stripe integration facilitates easy and secure online payments.

## **Library system**

[gitHub](#)

InklyReads brings book enthusiasts together, a platform crafted using HTML, CSS, and JavaScript. I've used Bootstrap for a user-friendly design. The diverse book collection is managed through a JSON server, and collaborative development is streamlined with Git and GitHub.

## **Glaze-and-Grace**

[gitHub](#)

Designed and developed a home decor e-commerce platform using React, NodeJs, Express, and Postgres, integrating security measures with technologies like JWT, Joi, Multer, and OAuth.

---

## **EDUCATION**

### **Software Engineering**

Bachelor of software engineer Hashemite University | 2020 - present

### **Coding Academy by Orange**

4 Months Back-end web developer Bootcamp | 09/2023 – 012/2023
