## Full Stack Developer

### Career Objective

A recent graduate in Network and Information Security from Al-Balqa Applied University, with intensive practical training at Orange Programming Academy for 5 months in web application development using Frontend and Backend technologies.

I have experience in building full-stack applications, designing user interfaces, and managing projects using version control systems like Git. I am seeking to join a professional team where I can apply my technical and managerial skills, contribute to developing innovative and secure software solutions, and enhance my programming expertise.

### Core Competencies

- Time Management
- Team Collaboration
- Problem-Solving
- Document Management
- Organizational Skills

### Technical Knowledge

**Programming Languages:** Java, C++, JavaScript, HTML, CSS, React, PHP,

**Laravel Database:** SQL, MySQL

**Operating Systems:** Windows

**Software Development Practices:** Scrum, Agile

**Tools:** Microsoft Office , Git, GitHub

### Work Experience

Orange Coding Academy – Aqaba, Jordan

Full Stack Developer Trainee

Dec 2023 – may 2024

- Learned and applied web development technologies using HTML, CSS, JavaScript, React.js (Frontend) and PHP, Laravel (Backend).
- Utilized Git/GitHub for code and project management.
- Participated in developing integrated projects, including UI/UX design development.

- Strengthened teamwork, problem-solving, and time management skills.

## Academic Projects

### Task Management System

A web-based system for task management that allows users to create, categorize, and track tasks through an organized dashboard. (IN [JS , HTML , CSS](#) )

### Coding School for Kids

An interactive educational platform designed to teach children programming basics through engaging exercises and fun learning games. (IN [JS , HTML , CSS , REACT](#) )

### E-Commerce Website – for Electrical Devices

An online store specializing in selling fresh juices with features such as user registration, product management, shopping cart, and order tracking. (IN [JS , HTML , CSS , PHP , MY SQL](#) )

### LuxLodge Hotel Rental

Developed a

hotel booking platform featuring room browsing, reservation management, and secure payment processing. Built with Laravel, the system supports CRUD operations for rooms, bookings, and user/admin management, ensuring scalability and performance. The platform provides an intuitive interface for guests to explore accommodations and for administrators to efficiently manage bookings. (IN [JS , HTML , CSS , LARAVEL](#) )
