Process Evaluation	Problem-Solving Ability	Problem-Solving Ability
Performance Review	Project Management	Effective Communication
Data Analytics Skills	Creativity and Innovation	Attention to Detail
Requirement Analysis	Customer-Centric Approach	Team Collaboration

Experience

Orange Coding Academy

MAY 2024 - NOV 2024

Trainee at Orange Coding Academy

Work Experiences:

- Assisted in IT operations, helping maintain and improve front-end and back-end systems.
- Supported the deployment of new technology, gaining hands-on experience in enterprise environments.
- Worked with a team on daily tasks and projects, improving teamwork and technical skills.
- Helped design and implement database management solutions, boosting data integrity and performance.
- Participated in software integration and configuration, learning about scalable application development.
- Used JavaScript, HTML, and Node.js for development tasks.

Projects

1) Intelligent Mailbox System (IMS)

[Github link](#)

Description: The Entakhib Parliamentary Election System is a secure and user-friendly digital platform for voting. It uses biometric checks and secure codes to ensure safe elections. Users can vote remotely, see real-time results, track voter turnout, and manage candidate details through the app.

2) Jordan Journey - Ticket Booking System

[Github link](#)

Description: The Jordan Journey Ticket Booking System makes booking travel easy and secure. It uses user authentication and a booking code for safety. Through the app, users can manage their travel plans, view bookings, choose seats, and organize itineraries with ease.
