## 2) Online Quiz Website

Description : Using HTML, CSS , JavaScript and Bootstrap , developed an interactive online quiz website! Users can take four pick from three different quizzes, all accessible from a single platform After completing a quiz, the website displays their score along with detailed results, highlighting both correct and incorrect answers.

## 3) Ecommerce online shopping

Description: This project is an eCommerce online shopping website developed to provide users with a seamless and engaging shopping experience. The website leverages modern web technologies to create a responsive, user-friendly platform where customers can browse, search, and purchase products effortlessly. The technologies used in this project include HTML for the structure and content of web pages, CSS for styling and layout to ensure a visually appealing design, Bootstrap for creating a responsive and mobilefriendly interface, JavaScript to add interactivity and enhance user experience, PHP for server-side scripting and handling backend logic, and SQL for database management to store and retrieve product and user information.

## 4) Sona hotel room reservations

Description: A hotel room reservation facility with room browsing and payment features. Used Laravel for CRUD operations and user/admin management, with emphasis on scalability and performance.

## Education & Credentials

### Hasemite university, Jordan

2023

Bachelor's in computer engineering
