FullStack Developer | Computer Science

## CAREER

## OBJECTIVE

A dedicated and results-driven Full-Stack Developer with hands-on experience in designing and building responsive, scalable web applications using HTML, CSS, JavaScript, React, and Node.js. Proven ability to collaborate with cross-functional teams and deliver high-quality software solutions on time. Skilled in both front-end and back-end development, with a focus on performance optimization, security, and user experience. Seeking to leverage my expertise to contribute to innovative projects and further develop my skills in modern web technologies.

## Core Competencies

Software Development

Analytical thinking

Performance Review

Data Analytics Skills

Requirement Analysis

Critical Thinking

Problem-Solving Ability

Good team collaboration

Creativity and Innovation

Time Management

Problem-Solving Ability

Effective Communication

Team Collaboration

## Technical Knowledge

**Programming Languages:** Python, Java, C++, JavaScript, HTML/CSS, PHP

**Database:** SQL, MySQL, SQL Server

**Operating Systems:** Windows, Linux/Unix

**Software Development Practices (SDLC):** Scrum, Agile

**Other Tools:** MS Office (Word, Excel, PowerPoin,wordt), Git (Version Control Systems)

## Academic Projects

### 1) Personal portfolio

Designed and developed a fully responsive personal portfolio using HTML, CSS, JavaScript, and React to showcase my web development skills and projects. Integrated dynamic sections for project display and a functional contact form, ensuring smooth communication with potential employers. Focused on creating a clean, user-friendly interface optimized for performance and accessibility. Deployed the site on GitHub Pages with a custom domain to ensure fast loading times and seamless access across devices.

### Home Renting Website (Airbnb-like)

Developed a full-featured home renting platform using Laravel, modeled after Airbnb. The site allows users to list, search, and book properties with features such as user authentication, property management, and a booking system. Implemented dynamic filtering and search functionalities to enhance the user experience. The project emphasizes performance, security, and scalability, offering a seamless platform for both property owners and renters.
