---

## Professional Summary

Mahmoud Kouf is a recent graduate based in Amman, Jordan, with a degree in Artificial Intelligence. He is incredibly passionate about the power of data and its potential. For him, working with data is like uncovering hidden treasures, and he is excited by the challenge of extracting valuable insights from raw information. Whether it's through Python, R, or tools like Power BI and Tableau, he is here to harness the potential of data and turn it into a force for informed decision-making.
