- Team Collaboration

### PERSONAL INFORMATION

- Nationality: Jordanian.
- Date of Birth: 9 November 2002.
- Marital Status: Single
- Languages: Arabic and English

### SUMMARY

I am a graduate of Aqaba University of Technology, majoring in Artificial Intelligence, with proven experience in internships in programming with Orange Academy. I have proven ability to apply technical skills in Java, HTML, CSS, PHP, Laravel and React in practical and real-world situations, which has been demonstrated through internships and academic projects. I have strong interpersonal and communication skills, enhanced through successful team collaboration and leadership roles in various projects.

### WORK EXPERIENCE

- Collaborate with a team of professionals in daily tasks and long-term projects, enhancing teamwork and technical skills.
- Participate in the integration and configuration of software solutions, and gain insights into architectural decisions involved in the development of scalable applications. Use programming languages like Java, HTML, CSS, PHP, Laravel, React for development tasks.

### Technical Knowledge

- Programming Languages: Java, HTML, CSS, PHP.
- framework:react,laravel.
- Database: SQL, MySQL, SQL Server.
- Operating Systems: Windows
- Other Tools: MS Office (Word, Excel, PowerPoint).

### EDUCATION

- Orange Coding Academy | May 5th – November 5th, 2024  
Full stack web developer.
- I studied artificial intelligence at Aqaba University of Technology.

### PROJECTS

- Management project->build used JavaScript/HTML/CSS

(The Website Management System is a comprehensive platform designed to streamline the creation, organization, and maintenance of websites. It provides an intuitive interface for users with varying levels of technical expertise to manage website content, structure, and performance. This system is ideal for businesses, organizations, or individuals looking to build a dynamic, scalable, and user-friendly online presence).

- Event management system->build used php/JavaScript/HTML/CSS

(The Event Management System (EMS) is a web-based platform designed to simplify the planning, organization, and management of events. It enables users to create, promote, and manage events seamlessly, while providing participants with an easy way to discover, register, and attend events. The system is suitable for organizers of conferences, workshops, concerts, corporate events, or any other type of gathering).

- Booking project->build used laravel/php/JavaScript/HTML/CSS

(The Online Booking System is a web-based platform designed to provide users with an efficient and user-friendly solution for booking various services, such as hotels, appointments, events, transportation, and more. This system allows businesses to automate their booking process and customers to make reservations with ease, ensuring smooth communication, seamless scheduling, and secure payments).
