PROFESSIONAL EXPERIENCE

Coding Academy By Orange

Feb 2023 - Aug 2023

Full stack web and mobile developer

- Developed and implemented a responsive website using HTML, CSS, and Bootstrap, resulting in improved user engagement and accessibility across various devices.
- Collaborated on a React-based project, contributing to the development of dynamic and interactive user interfaces that enhanced user experience and increased user retention.
- Successfully integrated SQL and MongoDB databases into web applications, ensuring efficient data storage, retrieval, and manipulation, and maintaining data integrity.
- Designed and built RESTful APIs, enabling seamless data integration and communication between front-end and back-end systems, improving overall system functionality.
- Demonstrated exceptional problem-solving abilities by resolving complex technical issues, optimizing code performance, and ensuring smooth project execution.

Tuned Applications

Fep 2022 To Aug 2022

Flutter Developer

- Successfully developed and deployed beautiful, high-performance applications using Flutter, demonstrating a deep understanding of fundamental concepts and best practices.
- Proficient in utilizing various types of widgets to create visually stunning and user-friendly interfaces, resulting in enhanced user experiences.

EDUCATION

Hashemite University

2020 - Present

bachelor in software engineering

PROJECTS

ChatBot

This project has been an incredible journey, allowing me to dive deep into the world of conversational AI and explore the limitless possibilities it offers. With React as my framework and OpenAI's API as my powerful tool, I've created a ChatBot that can engage in dynamic conversations, answer questions, and provide personalized assistance.

Movies Platform

[\(Live Demo\)](#)

With my expertise in React, I've created a seamless and user-friendly interface that allows you to explore a vast library of movies and TV shows from various genres and eras.

Utilizing the movies API, I've integrated comprehensive information such as synopses, ratings, cast and crew details, making it easier for you to make informed choices about what to watch next

Travel Planner - Group project

[\(Live Demo\)](#)

Using React as my framework, I've crafted platform that allows users to explore a wide range of travel destinations, uncover hidden gems, and plan their dream vacations with ease.
