- Team Work
- Time management

Language

Arabic:

Native

English:

Very good command both verbally and written

Mohammad Al-Ghzawi

Full-Stack Web Developer

I am a junior full stack web developer with a passion for crafting user-friendly web applications. Proficient in front-end and back-end technologies, I thrive on solving coding challenges and working collaboratively. Committed to continuous learning, I seek opportunities to grow and deliver high-quality solutions to make a meaningful impact in web development.

Experience & Projects

Full-Stack web development

Trainee

Jun 2023- Present

Coding Academy by Orange | Irbid-Jordan

Enrolled in a 6-month Full Stack web development bootcamp, divided into two distinct phases: frontend and backend development. Achieved 10 projects during this intensive program, honing skills in both frontend and backend technologies. In the initial phase, I focused on backend development, where I successfully accomplished three projects using PHP and Laravel:

- I've developed two E-commerce projects entirely from the ground up using PHP.
- I've constructed a Donation Website using the Laravel framework.

You can review my project repositories on GitHub using the following links:

- <https://github.com/murad-97/laravel-project>
- <https://github.com/test-orange-repo/FruitsVegetables>

Additionally, I took on key roles in project management, acting as a Scrum Master in one PHP project and a Product Owner in another.

Currently, I'm immersed in the frontend phase, focusing on technologies such as HTML5, CSS3, JavaScript (ES6), and ReactJS. I've successfully completed three projects in web development so far. My first two projects were built using HTML and CSS, and JavaScript respectively. Recently, I wrapped up my third project, which involved using ReactJS.

As the culmination of this bootcamp, I will undertake a full-stack project that integrates both frontend and backend technologies to demonstrate my comprehensive web development skills.

Education

The University of Jordan

Amman-Jordan | 2018-2022

Agriculture engineering

GPA: Very Good
