PROFILE

"I am a highly motivated Full Stack Web Developer with a proven track record of building responsive and user-friendly web applications. With a solid foundation in front-end and back-end development, I excel at turning design concepts into seamless digital experiences. Proficient in technologies like HTML, CSS, JavaScript and React, and databases such as SQL , PHP , Larval , I am dedicated to creating efficient, secure, and innovative solutions. I thrive in collaborative environments, continuously seek opportunities for growth, and am passionate about delivering high-quality web applications that meet and exceed user expectations."

PROFESSIONAL EXPERIENCE

Full stake Developer, Orange Coding Academy, Aqaba, Jordan

Jun 2023 – Present

- Develop and maintain web applications using Laravel and React Framework and html, css and Java Script
- Collaborate with multifunctional teams to deliver high-quality software products on time
- Implement automated testing and continuous integration to improve software quality and efficiency.

Software Engineering Intern, Arab Bridge Shipping, Aqaba, Jordan

Mar 2018 - Jun 2018

- Worked as part of a team to develop and maintain web applications
- Participate in code reviews and contribute to the development of software documentation.
- Assisted in the implementation of automated testing and continuous integration to improve software quality and efficiency.
- Conducted research on emerging technologies and presented findings to the development team.
- Collaborated with cross-functional teams to deliver high-quality software products on time.

Projects

1 - Quiz App - Using Html , CSS and JavaScript

"As Scrum Master " Build a responsive and dynamic quiz website that requires the user to register and sign in to answer the quiz questions, and compare the user's answers with the correct answers previously saved on local storage

2 - Services Hotel Booking Project - Using LARAVEL

Create a web application using Larval, Bootstrap, HTML, CSS, and MySQL. It allows users to book services or explore volunteer opportunities. Includes user authentication, admin dashboard, and coherent visual identity.

3 - E-Commerce Website - Using PHP

You will build an e-commerce web application using PHP and MYSQL, remember your project should meet the following client brief.
