SUMMARY

I am an experienced and dedicated full stack web developer & Architect with a passion for creating innovative and user-friendly websites. With a solid background in front-end and back-end development, I possess a diverse skill set that enables me to handle every aspect of the software development life cycle. My expertise includes proficiency in various programming languages, frameworks, and tools, allowing me to adapt to new technologies and deliver high-quality solutions. I am a problem-solver by nature, adept at analyzing complex requirements and translating them into efficient and scalable code. With a strong emphasis on clean coding practices and attention to detail, I am committed to delivering optimized web experiences that exceed client expectations.

EXPERIENCE

Full Stack Web Developer – *Feb 2023 - Present*

Orange Coding Academy / Jordan

- **Proficiency in Programming Languages:** Learned how to write codes, understand programming concepts, and solve problems using various programming languages.
- **Web Development Skills:** Learned the main fundamentals of web development, including HTML, CSS, and JavaScript. As well as being able to create interactive and responsive web pages, understand website structure, and work with front-end and back-end technologies.
- **Software Development Principles:** Acquired knowledge of software development principles such as software engineering methodologies, version control, debugging techniques, and software testing.
- **Database Management:** Gained an understanding of database concepts and how to work with database systems such as MySQL or and PHP MyAdmin. Also being able to design and implement databases, write SQL queries, and perform CRUD operations.
- **Problem-Solving and Algorithmic Thinking:** Learned how to break down complex problems into smaller, manageable tasks and develop algorithms to solve them efficiently.
- **Collaborative Development:** Learned how to collaborate effectively in a team environment using tools like Git and GitHub. They will gain experience working on group projects, following coding best practices, and participating in code reviews.
- **Project Development:** had the opportunity to work on real-life projects throughout the coding academy program. This hands-on experience allowed me to apply knowledge, work on practical coding challenges.
- **Soft Skills:** such as communication, teamwork, problem-solving, and critical thinking. These skills are essential for success in the workplace and collaborating effectively with others.

EDUCATION

Bachelor of Architecture/ Faculty of Engineering – Aug 2023
Al-Balqa' Applied University

MIT LEAPS PROGRAM, Leadership & Professional Strategies – Sep 2022
Massachusetts Institute of Technology

Relevant SKILLS

- Programming Languages: PHP, HTML, CSS, JavaScript and Bootstrap
 - Tools: Visual Studio Code, MySQL, PhpMyAdmin and MS Office
 - Soft Skills: Continuous Learning, Teamwork, Strategic Planning, Time Management, Conflict Resolution and Collaboration.
-

PROJECTS

- **Wireframe and Mock-up for my portfolio**

Technology Used: HTML & CSS & Photoshop.

Enhanced my technical skills, design capabilities, and project management abilities. It provided me with a strong foundation for pursuing a career in web development, UX design, or graphic design.

- **Online Quiz Website**

Technology Used: JavaScript.

Creating an online quiz website using JavaScript expanded my technical skills, deepen my understanding of web development, and equipped me with valuable problem-solving. Gaining hands-on experience in writing JavaScript code, manipulating the DOM (Document Object Model), and handling user interactions.

- **Let's Bloom Website - Ecommerce**

Technology Used: PHP and MySQL.

Building an e-commerce website with PHP and MySQL enhanced my skills in backend web development. As well as learning how to handle user authentication, manage product catalogs, process payments, and interact with databases using PHP and MySQL.

- **Rentz Platform – Renting Management System**

Technology Used: PHP and Laravel

Building a renting management system using Laravel enhanced my proficiency in this popular PHP framework. Laravel provides an efficient development environment, allowing you to work with database interactions, routing, authentication, and other essential features. / Database Management / Authentication and Authorization / API Development.

- **Employee Management System**

Technology Used: PHP and MySQL

Working with MySQL in the context of an Employee Management System provided me with practical experience in database management. Also learning how to design and create database schemas, implement CRUD (Create, Read, Update, and Delete) operations, and manage employee data effectively.
