Software Engineer | Software Developer | web developer

## CAREER OBJECTIVE

A passionate graduate from the University of Jordan, talented in web development, with a solid foundation and hands-on experience in programming. As an active and self-motivated learner, I continuously willing to expand my knowledge and skills in the tech industry. I have the ability to quickly adapt and learn new technologies, which allows me to stay ahead of industry trends and apply innovative solutions. Eager to continue learning and improving, I am actively seeking an opportunity to gain practical experience, collaborate with innovative teams, and contribute to the development of real-world projects.

## Core Competencies

Software Development  
Problem-Solving Ability

Critical Thinking  
Creativity and Innovation  
Team Collaboration

Time Management  
Attention to Detail

## Technical Knowledge

**Development:** Java, JavaScript, HTML/CSS, Laravel, React, python (basics), Docker Desktop, Bootstrap, Postman (API testing)

**Database:** MySQL, SQLite, Firebase

**Operating Systems:** Windows, Linux (Ubuntu)

**Other Tools:** MS Office (Word, PowerPoint), Git (Version Control Systems)

## Internship

**Orange Coding Academy, Balqa**

**Dec 2024 – May 2025**

### Hand-on Experience:

During this bootcamp, I gained hands-on experience in full-stack development using Laravel, PHP, MySQL, HTML, CSS, JavaScript, and React. I developed and maintained web applications, implementing both front-end and back-end functionalities while writing clean, efficient, and scalable code following best practices. I collaborated with senior developers on real-world projects, debugging and optimizing applications. My work involved working with databases, API integrations, and responsive UI/UX designs. This experience enhanced my problem-solving and teamwork skills in an agile development environment.

I worked on multiple projects, including:

- 1- **Booking system:** Built a property booking web app using Laravel, featuring user authentication, property listings, property search. Developed a dashboard for both admin and lessor to managing properties and bookings.
- 2- **Quiz app:** Developed a front-end quiz application allowing users to register, take a quiz, and view results with pass/fail feedback. Implemented responsive UI using HTML, CSS, and JavaScript for an interactive user experience.
- 3- **Ticket management system**

## Programming Projects

### 1) Server-client game

a multi-threaded Java TCP game, where a player connects to the server, and plays 5 multi-choice questions using a command line argument. the game requires two players to start.

### 2) Book finder

a Flask-based web application that allows users to search for books using the **Google Books API**, register and log in to manage their personalized library, and save books to a "Want to Read" list. Users can search for books by title, author, or keyword, view book details, and add their favorites to a personal collection. The app features **secure user authentication**, ensuring that each user's book list is private and accessible only to them. Built with **Flask, Python, HTML, CSS, JavaScript, and SQLite**

## Education & Credentials

### University of Jordan, Jordan

2024

Bachelor's in orthotics and prosthetics

Grade: 3.14 out of 4

## Soft Skills

- **Communication skills**
- **Active learning**
- **Problem-Solving**
- **Attention to Detail**
