Tech Park is a smart and safety parking system, implemented by Networking and IOT using Cisco tools "packet tracer".
it is a technology-based solution that aims to improve the efficiency of search and convenience of the parking process, users can find empty parking slots in the desired placed they are going to.

• Work Experience

Trainee at Coding Academy by Orange June 2023 - Dec 2023

Intensive course in Full Stack Web Development in collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT)
We have worked **10** projects either individual or as a team during our journey.

Technical Support Yarmouk University Feb 2022 - Feb 2023

Provided solutions to operations issues for users of University System, working via Support student center.

• Projects

- Movie Star

A cinema booking website with a focus on booking movies and leaving comments provides a platform for users to discover, book, and discuss movies they intend to watch or have already watched.
Technologies we used are HTML, CSS, JS, API, React. [GitHub Link](#)

- Green Hands

Green Hands is an innovative web platform we conceived and developed using Laravel framework. This project was driven by our passion for environmental conservation and sustainability. Green Hands serves as a specialized website dedicated to tree planting initiatives and charitable contributions towards reforestation efforts.

Technologies we used are HTML, CSS, JS, Laravel, SQL. [GitHub Link](#)

- Home Made Harmony

Home Made Harmony is a dynamic e-commerce web application that me and my team members conceptualized, designed. This project was created to demonstrate our expertise in web development and my ability to create a feature-rich, user-friendly online shopping experience.
Technologies we used are HTML, CSS, JS, PHP, SQL. [GitHub Link](#)
