Full-stack Developer | PHP | Laravel | SQL | REACT JS

As a full-stack developer, I have gained valuable experience during my 6-month tenure at Coding Academy by Orange Boot Camp. My expertise covers both front-end and back-end development, allowing me to create robust and dynamic web applications. Complementing to this, I have a strong understanding of UI principles and strive to create seamless user experiences.

PROFESSIONAL EXPERIENCE

Trainee as a Full Stack Developer, Orange

Feb 2023 - Jul 2023

- Developed expertise in creating engaging user interfaces using JavaScript, HTML, CSS, Bootstrap, and React.js.
- Demonstrated proficiency in server-side development, utilizing PHP, MySQL, Laravel, and working with databases and database relations.
- Actively participated in the design, development, and testing phases of various projects, ensuring adherence to best practices in software development.
- Collaborated closely with a team of skilled developers, contributing to problem-solving and knowledge-sharing efforts

Trainee in energy laboratories, Royal Scientific Society

PROJECTS

Rental Platform

May 2023 - Jun 2023

- Technologies used: Laravel framework / MySQL / JavaScript / CSS / Bootstrap
- Description: The rental platform is a website where users can rent various items or services. It could be a marketplace for renting accommodation. Users can browse listings, make reservations, manage bookings, and communicate with the rental providers.

Tickets Website

May 2023 - Jun 2023

- Technologies used: Laravel framework / MySQL / JavaScript / CSS / Bootstrap
- Description: The Tickets Website is a platform designed for users to submit their technical problems or support requests. The website serves as a communication channel between users, administrators, and employees. The process begins with users submitting their problem tickets through the website. The admin then reviews and assigns the tickets to the appropriate employees or technicians based on their expertise.

E-commerce Website	Apr 2023 - May 2023
<ul style="list-style-type: none"> • Technologies used: Pure PHP / MySQL / JavaScript / CSS / Bootstrap • Description: The e-commerce website is an online platform where users can browse and purchase jewelry products. It typically includes features such as product listings, search functionality, shopping carts, secure payment processing, and order management. Users can create accounts, track their orders, and interact with seller. 	
Quizzes Website	Mar 2023 - Apr 2023
<ul style="list-style-type: none"> • Technology used: Pure JavaScript / CSS / Bootstrap • The quizzes website is a platform that allows users to take quizzes on various topics. It presents questions to the user and provides options to select the correct answer. The website include features like scoring, timers, and multiple quiz categories. 	
Portfolio website	Feb 2023 - Mar 2023
<ul style="list-style-type: none"> • Technology used: Pure CSS3 • Description: The portfolio website is a personal website that showcases my work, skills, and achievements. It provides information about me as a professional and serves as a platform to display my projects, resume, and contact information.
