## CAREER OBJECTIVE

A recent graduate in Computer Engineering from Al-Balqa' Applied University, with practical experience in full-stack web development through courses and certifications. Proficient in HTML, CSS, JavaScript, SQL, PHP, Laravel and React.JS, with experience in both frontend and backend development. Known for strong teamwork and communication skills, developed through collaboration on various projects. Looking forward to applying my technical knowledge and skills in an entry-level position within the technology sector.

---

## Academic Projects

### E-commerce Platform (FITZOON)

[FITZOON Repo. link](#)

The project was developed using Agile methodology with close team collaboration to optimize UI/UX. An innovative e-commerce platform for football apparel was created, featuring product filtering, a user-friendly shopping cart, Wishlist, and integrated PayPal payment. Built with **HTML5, CSS3, JavaScript, PHP**, and **MySQL**, it includes advanced search and personalized user profiles. The administrative dashboard allows efficient management of users, products, orders, and site analytics.

### MyJourney

[MyJourney Repo. link](#)

Built with **HTML5, CSS3, JavaScript**, and integrated with an **API**, this travel planning website offers a seamless experience for creating customized itineraries. Users can explore hotels and restaurants, organize their trips with sorting features, and enjoy an intuitive UX/UI design for easy navigation and trip management.
