---

As a dedicated full-stack web and mobile developer specializing in JavaScript (React), Node.js, Express.js, Mongo DB, and React Native I have successfully implemented 10 projects across various technologies, demonstrating strong problem-solving abilities and a keen eye for detail. My proven teamwork and time management skills ensure that I deliver projects before or within the deadline. Additionally, I bring a background as a technical consultant in Microsoft Dynamics 365 and Power Platform, making me a versatile full-stack web and mobile developer.

My skills encompass front-end and back-end development, database design, API integration, and UI/UX design. Throughout my career, I have maintained a proven track record of delivering high-quality, scalable, and performance-driven applications that precisely meet the business requirements. I am committed to continuously learning and adapting to new technologies and industry trends, allowing me to provide innovative solutions for clients.

---

## Professional Experience

### Coding Academy by Orange Jordan

**February 2023 - Present**

Full-Stack Web & Mobile Developer Trainee

- Learned modern technologies: JavaScript (React), Node.js, Express.js, Mongo DB, and React Native
- Implemented 10 projects on different technologies; individually and within groups
- Took 100+ hours of soft and digital skills, like: emotional intelligence, UX/UI, and agility
- Acted as a Scrum Master and Product Owner in different projects

Acquired expertise in advanced technologies, implemented real project within professional context and used different technologies to be an experienced full-stack web & mobile developer.

### ConsultTik

**October 2022 - February 2023**

Microsoft Dynamics 365 / Power Platform Technical Consultant

- Implement and utilize cloud-based ERP and CRM application, Microsoft Dynamics 365, for optimized operations and customer engagement.
- Leverage Power Platform's low-code development tools, including Power Apps, Power Automate, Power BI, and Power Virtual Agents.
- Develop custom business applications and create canvas and model-driven apps, connect to data sources, customize the user interface, and integrate with other Power Platform tools.
- Help the organization optimize their operations and improve their customer engagement using these innovative software solutions.

---

## Education

### Tafila Technical University

**February 2019 - September 2022**

Bachelor's degree, Computer Engineering

---

## Programming Knowledge

---

### Programming Technologies

- HTML, CSS, SASS, Bootstrap, JavaScript
- MERN stack (MongoDB, Express.js, React, Node.js)
- React Native
- Microsoft Dynamics 365
- Power Apps and Power Automate

### Programming Skills

- Responsive design
- UX/UI: wire-framing, prototyping, user personas
- API Integration
- Search Engine Optimization (SEO)

### Software

- VS code
- Git and GitHub
- Microsoft dynamics 365
- Power Platform
- SharePoint
- Figma

---

## Interpersonal Skills

---

- Effective Communication Skills
- Knowledge Sharing
- Punctuality
- Self-learning

---

## Some Projects

---

- [Social Media Platform \( MusicVibes \)](#):

**Technologies:** HTML, CSS, Sass, JavaScript, React, and JSON server.

**Key features:** a dynamic social media platform empowering artists to seamlessly share, interact, comment, edit, delete, and curate their creative content within a vibrant and supportive community.

- [E-commerce Website \( Bloom-Beauty \)](#):

**Technologies:** HTML, CSS, Bootstrap, JavaScript, React, and JSON server.

**Key features:** It features responsive design, captivating visuals, engaging landing section, registration/login, and wide product range, easy ordering, and personalized profiles. The platform utilized enhanced SEO techniques.

- [GitHub Finder](#):

**Technologies:** HTML, CSS, Bootstrap, JavaScript, and API

**Key features:** In this project, I worked on two views: the Profile View, which was cloned from GitHub, and the Comparison View. The tool enables users to search for usernames, view profile details, and determine a winner based on two criteria (#repos and #followers). The project had responsive design and fetching data from the API.

\* All underlined names are GitHub links for the project repository.
