Orange Coding Academy, Al-Balqa

DEC 2024 – Present

Intern, Full-stack Developer

- Assisted in the development and implementation of both front-end and back-end functionalities for a range of web applications, utilizing technologies such as PHP, JavaScript, Laravel, React JS, HTML,CSS, and MySQL.
- Collaborated with senior developers to enhance code quality and optimize application performance, participating in sprint meetings and adhering to Agile methodologies.
- Gained hands-on experience in API integration, testing, and debugging, ensuring smooth functionality and performance across applications.
- Developed key soft skills, including (Effective Communication, Team Collaboration, Problem Solving, Time Management, Active Listening).

ACADEMIC PROJECTS

Movie Quiz Project

The Movie Quiz Project offers an interactive experience for movie enthusiasts, featuring quizzes on various categories like actors, genres, and more. Users test their knowledge, receive scores, and get real-time feedback. It also includes an AI chatbot for personalized movie recommendations, answers, and casual conversations. The project is built with HTML, CSS, Bootstrap, and JavaScript, ensuring a responsive, user-friendly interface for both desktop and mobile devices.

E-Commerce website

It is an eCommerce platform for selling clothes, where users can browse products, add items to their cart, and complete secure purchases. The website provides a seamless shopping experience. It is built using HTML, CSS, JavaScript, PHP, and MySQL, with HTML and CSS for the front-end, JavaScript for interactive features, and PHP for back-end operations such as processing user data and managing orders, integrated with MySQL for storing information.

Car Rental Website

The car rental website allows users to browse cars, check availability, and make bookings, while lessors can list their cars for rent. It offers a user-friendly interface with features like booking management, car details, and secure payment options. Built with HTML, CSS, JavaScript, Laravel, and MySQL, the site ensures a responsive design, interactive features, and handles back-end processes such as user authentication and booking management.
