Software Engineer | Full Stack Developer | Graphic designer

CAREER OBJECTIVE

Software Engineering graduate with expertise in full-stack web development (HTML, CSS, JavaScript, WordPress) and proven experience in leading projects and integrating APIs. Strong problem-solving and collaboration skills, with freelance success on Upwork. Also skilled in graphic design using Blender and Photoshop, seeking to apply my technical and creative skills in a dynamic web development role.

Core Competencies

- Full Stack Development | MVC Architecture | OOP in PHP | API Integration | Data Scraping
- Project Management | Requirement Gathering & Analysis | Agile Methodology (Scrum) | Git & GitHub Collaboration | Freelance Client Communication | Time Management
- Problem Solving & Critical Thinking | Team Collaboration & Scrum Principles | Innovative Problem-Solving | Attention to Detail | Team Collaboration | Fast Learner

Technical Knowledge

Frontend: HTML, CSS, JavaScript, jQuery, Bootstrap, React

Backend: PHP, Laravel, AJAX

Database: SQL, MySQL, SQL Server

Operating Systems: Windows

Software Development Practices (SDLC): Scrum, Agile

Other Tools: Git (Version Control), GitHub, Visual Studio, VS Code, Trello

UI/UX Tools: Figma

Experience

Upwork

Jan 2022 - Present

Freelancer, Full stack web developer

Work Experiences:

- Successfully completed 12+ projects, achieving a 100% job success rate and consistently receiving positive client feedback.
- Designed, developed, and optimized responsive websites and web applications using HTML, CSS, JavaScript, PHP, and WordPress.
- Managed full project lifecycles from requirement gathering to deployment, ensuring high-quality and client-satisfaction-driven solutions.
- Specialized in creating user-friendly, conversion-optimized websites, landing pages, and custom web applications.

Bootcamp

Orange coding academy, Amman

Sep 2024 – Jan 2025

Intern, Full stack web developer

Work Experiences:

- **Waqt – E-commerce Platform for Watches**

Collaborated in a team to build a full-stack e-commerce platform for watches, integrating Google login, PayPal (with sandbox setup), and ChatGPT for customer support, focused on seamless user experience. [GitHub Repo](#)

- **Smart Spending – Personal Finance Management Platform**

As Scrum Master and front-end developer, I led the team to build an intuitive platform for tracking income, managing

expenses, and planning savings, focusing on enhancing personal financial habits. [GitHub Repo](#)

Internship

Era Tech, Amman

Jul 2023 – Sep 2025

Intern, Full stack web developer

Achievements: Crafted a distinctive logo during university field training—dot رأس السطح—which became the visual identity for the TV show بكل جرأة. This logo is now featured on social media and the show's YouTube channel, which has over 76,000 subscribers.

Work Experiences: Assisted in designing and optimizing user interfaces for web applications, improving user experience through responsive and interactive front-end development with HTML, CSS, and JavaScript.

Personal Projects

1) Tabadol – YouTube Community Platform

Description: Tabadol is a full-stack platform that helps small YouTubers meet YouTube's requirements and engage with the community. I led the development and integration of Google and YouTube APIs, using HTML, CSS, JavaScript, PHP, and MySQL. [Live Demo](#)

2) Tik Saver – TikTok Content Downloader

Description: Tik Saver is a web-based tool designed to allow users to download TikTok videos without watermarks. It provides a seamless and easy-to-use interface for extracting video content from TikTok, enabling quick and efficient downloading. [Live Demo](#)

3) Dental Implant Magazine News Website

Description: Developed a news website for the dental implant industry using **WordPress** and **Elementor**. The site features a user-friendly layout to showcase articles, updates, and resources for dental professionals. Focused on responsive design and seamless content management, allowing for easy updates and smooth navigation. [Live Demo](#)

4) Thrive Themes WordPress Development for Upwork Client

Description: Worked with an Upwork client to implement a multi-step funnel that involved passing URL parameters across multiple pages to deliver personalized content. The project included integrating conditional display features, ensuring that user selections on earlier pages were carried through to later pages for customized user experiences. Utilized WordPress, Thrive Themes, and Elementor Pro to develop the funnel and ensure seamless data flow across the pages.

5) Design Pages Using Elementor Pro

Description: Designed multiple fully responsive pages using Elementor Pro, focusing on creating high-converting layouts optimized for user engagement. The project involved developing pages for various purposes, including landing pages, service pages, and more, with a focus on clear calls to action, seamless navigation, and a visually appealing user experience. Delivered the project on time, meeting the client's requirements for functionality and design.

Technologies Used: WordPress, Elementor Pro, HTML, CSS.

Academic Projects

1) CSS Editor (Buildez)

Description: Buildez is a web-based tool for creating dynamic and customizable clip-path shapes. It allows users to design unique shapes and apply them to various elements with ease. The project focuses on combining design and development to provide a seamless, interactive experience for creating complex clip-paths.

Education

Hashemite University, Jordan

2024

Bachelor's in Software Engineer

Grade: 3.13 out of 4

Conferences and Training Attended:

- Received Certificate of attend by step by step at Hashemite University
 - Attended a web development program by Step by Step, gaining foundational skills through their structured learning approach.
