Full-Stack Web Developer | Computer Engineer

Career Objective

Full Stack Developer with a solid background in creating user-focused web applications, adept in front-end and back-end technologies. Acquired significant hands-on experience by completing projects at Orange Coding Academy. Skilled in HTML, CSS, JavaScript, MySQL, Laravel, bootstrap, and React, with a strong commitment to writing clean, efficient code and delivering innovative solutions. Excited to bring my technical skills to a dynamic and forward-thinking web development team, where I can contribute creative solutions to challenging projects.

Technical skills

- Front-End: HTML5, CSS3, Bootstrap, JavaScript, React.
- Back-End: PHP, Laravel.
- Database: MySQL.
- Operating Systems: Windows.
- Software Development Practices (SDLC): Agile, Scrum.
- Tools: Visual Studio Code, Figma, Trello, GitHub.

Personal skills

- Team Collaboration.
- Communication Skills.
- Problem Solving.
- Quick learner with good time management.
- Skilled in prioritizing tasks effectively.
- Adaptable to new environments.

Experience

Full-Stack Development Trainee – Orange Coding Academy
September 2024 – December 2024.

- Currently training in full-stack development, working with frontend technologies (HTML, CSS, JavaScript, Bootstrap) and backend (PHP, Laravel) to build scalable web applications.

Software Engineer Intern – Bayt.com
October 2023 – January 2024

- Enhanced database applications for scalability and performance.
- Integrated user-facing elements developed by front-end developers.
- Solved performance and architectural challenges.

Projects

Orange Projects:

- **Scentify – E-commerce Platform for Perfumes**

Scentify is an e-commerce platform for perfumes developed as part of a group using HTML, CSS, JavaScript, Bootstrap, PHP, and MySQL. The platform features user authentication, product browsing, and order management. Worked on implementing key features such as the product catalog, user registration, and backend integration for seamless functionality.

- **Bookify – E-commerce Platform for Books**

Bookify is an e-commerce platform for selling books developed as part of a group using HTML, CSS, and JavaScript. The project integrates external APIs for product data and uses local storage for persistent user information. Key features include browsing, searching, and adding books to the cart. The focus is on user experience and responsive design. The team followed Agile methodology, allowing for adaptive planning and continuous delivery.
