OBJECTIVE

As a Full Stack Web Developer skilled in the LAMP stack, (Laravel, and React as a Framework) I have a strong foundation in web development. My hands-on experience with Agile projects during my training at Orange Academy, along with a scholarship in Full Stack Web Development, has refined my technical and soft skills. I am eager to apply my expertise to contribute to a dynamic web development team.

TECHNICAL SKILLS

Programming Languages: Web Development (HTML, CSS, JS, PHP, MySQL) , C# (for game development)
Tools & Frameworks: Visual Studio code, LAMP Stack (Linux, Apache, MySQL, PHP), Unity, Postman (API Testing)

SKILLS

- Time Management • Problem-Solving • Active Listening • Work Under Pressure • Critical Thinking
- Good Communication Skills • Microsoft Office (Word, Excel, PowerPoint) • Prompt Engineering

EDUCATION

Bachelors of Computer Information Systems
Al Al-Bayt University | Aug 2018 - Sep 2022

WORK EXPERIENCE

Full Stack Web Development
Orange Coding Academy | Jan 2025 - present

- **Comprehensive Full Stack Training :**Covers a wide range of technologies, including React, HTML, CSS, Laravel, and API development, to equip you with the skills needed to build complete web applications.
- **Hands-on Project Experience :**Focuses on real-world projects, utilizing Laravel and React, to strengthen your practical skills in web development.
- **Technical and Soft Skills Development :**Provides training not only in technical expertise but also in teamwork, communication, and project management, preparing me for success in the job market.

.NET Developer Trainee
Offtech Holding Group (Trainee) | Jul 2022 - Jan 2023

- Developed a web application that converts CSV files into JSON format and displays the data through an API

TECHNICAL COURSES

VR Game Developer

Digital Opportunity Trust (DOT Jordan) | Aug 2023 - Oct 2023

- Worked on developing a 3D VR game using Unity Engine and VR technology.
- Implemented dynamic AI enemies that follow the player through the maze.

Software Engineering Quality Control

The Hope International Company For Training | Nov 2022 -Feb 2023

- Experience in the field of IT with a focus on Testing, Quality Assurance and Control of Mobile Applications and Client-Server applications, effective use of QA and Testing practice.
- Familiar with test management, defect management and administration of automation tools.

Projects

MOFLIX (SEE MORE ON GITHUB)

- JavaScript-based web application that allows users to explore detailed information about TV series and top-rated movies using (TMDB) API.

CRAFTIFY (SEE MORE ON GITHUB)

- Full-featured e-commerce system (admin & public site) with secure role-based login, product & order management, cart & checkout, coupon validation, and responsive UI using PHP, MySQL, and Bootstrap.

GREEN ROOTS (SEE MORE ON GITHUB)

- An e-commerce platform built with Laravel, featuring user authentication, product management, and order tracking. The project leverages modern web development practices for a seamless, responsive experience.

LIFEATS (SEE MORE ON GITHUB)

- The project is built using Laravel for the back-end and uses Sanctum for token-based authentication.
- Frontend and backend were developed in two separate repositories and integrated together.

GRADUATION PROJECTS

- At-Home: E-commerce platform allowing users to easily buy and sell products.
- Best Of: Web system that helps users choose the best computer based on specific questions.
